

Requesting access to myCFM Portal

Before you proceed, you will need access to our myCFM Customer Portal. This is your one-stop-shop for everything you will need regarding your CFM engines (inquiries, manuals, spare parts, etc).

Follow this step by step process:

1. Navigate to <https://mycfmportal.com> and click on "Request Access"
2. Enter your official email address
3. Select your Organization from the list if available, otherwise, search using your Company Name and select the correct one from the results
4. Fill out the User Request form and submit. You will receive further instruction to gain access via emails from our Fleet Support team

The image shows three overlapping screenshots of the myCFM Portal website. The top screenshot shows the homepage with the 'Request Access' button highlighted in a red box. The middle screenshot shows the 'Welcome!' page with a form to enter an email address. The bottom screenshot shows the same page with a dropdown menu for selecting an organization, with 'Boeing Capital Corporation' selected.
