

Data Query Widget

The Data Query widget allows you to create queries and run custom reports and plotsets against a single engine or your entire fleet. View submitted and calculated data. Run a single query or schedule to be run daily.

Follow this step by step process:

1. Go to myCFMportal.com
2. Add widget using the + add widget button
3. Click on +New Query to create your query
4. Specify selected parameters & narrow search criteria, give your query a name and click Save & Run
5. View results under the results tab after receiving notification that query is complete

Data Query + New Query Queries ⚙

Query Name	Last Updated	Query Type	Scheduled	Schedule Expiration Date	Actions
Tops8drequest2TO	2014-10-08	Query	N/A	N/A	▶ 📅 🔄 📄 ✖
OilConsumption	2014-05-19	Query	N/A	N/A	▶ 📅 🔄 📄 ✖
oil_qty	2015-04-13	Query	N/A	N/A	▶ 📅 🔄 📄 ✖
