SPHU 3070: The French medical system: history and present (3 credits)

Discover how France built one of the world's most respected systems of medical care, from its historic roots to its modern-day organization.

Explore the Past

- Examine France's medical research in its former colonies
- Visit the Museum of the History of Medicine and the Curie Museum
- Study the doctors' resistance movement during World War II

Understand the Present

- Analyze France's system through the WHO Health Systems Building Blocks
- Learn about health financing, medical education, and emergency response
- Conduct an interview with a French resident about their healthcare experience

Create and Reflect

- Design a resource on the French health system for new residents
- Complete a final exam to synthesize your learning

Fulfills: Global Perspectives (NTC Core Curriculum)

Prerequisites: None
