SPHU 2030: Public health in France (3 credits)

Discover how history, politics, and culture shape France's world-renowned public health system—and how it compares with the U.S. and beyond.

Experience Paris Through a Public Health Lens

- Hear directly from French health policy makers
- Tour the Paris sewers to see the city's sanitation legacy firsthand
- Walk through a Parisian neighborhood to explore social and environmental determinants of health

Learn, Discuss, Create

Dive into in-depth class discussions on climate adaptation, cancer prevention, smoking cessation, and more.

Hands-On Projects

- Design a culturally informed public health campaign
- Create a photo portfolio exploring public health in the French context
- Wrap up with a final exam that ties it all together

Fulfills: Global Perspectives (NTC Core Curriculum)

Prerequisites: None
