

## **RSA Platform Upgrade Professional Services**

Services

### **Description:**

The Federal Home Loan Bank of Pittsburgh is seeking suppliers that have the capability to perform upgrade supportive services to the RSA platform.

The below information is a high-level scope of what the Bank is looking for from an RSA resource Standpoint:

- Architecture Overview:
  - RSA SecurID Software Version: Auth Mgr 8.4 P09
  - 3 IDR at each location (Production); 3 IDR at Iron Mountain
  - Web Tier Layer deployment – Existing
  - Internal AD integration – completed
  - External AD integration – AD built; integration needs completed

Use Cases to be addressed:

- Landing Page Development:
  - This is the chicklet landing page, we would like to know what options are available around this page. Our Bank did not like the look of this page during a demo.
- Citrix Netscaler Integration
- Setup Load balancer (Citrix Netscaler) to load balance IDR Services at each site (Grant St., Iron Mountain)
- Wyse Terminal integration – MFA on Storefront to force 2-Factor Authentication for a dedicated period of time.
- Access Manager migration of users (external) to an external customer AD (New)
- Integration to two legacy applications using Trusted Headers
- Integration to new application using SAML
- Security Review (Overall)
- Best Practices Review

**Date to Inquire about Opportunity:** March 13, 2020
