

2025 PRIORITIES

The Council of Producers and Distributors of Agrotechnology (CPDA) is a leading advocate for the agrotechnology industry, representing nearly 90% of the \$15 billion U.S. crop protection market.

CPDA FOCUSES ON SEVERAL KEY PRIORITIES TO SUPPORT ITS MEMBERS AND THE AGRICULTURAL COMMUNITY.

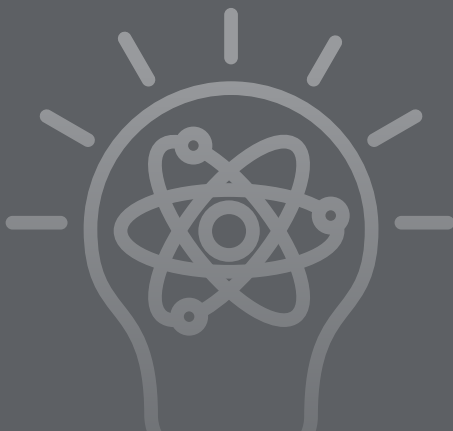

ENDANGERED SPECIES ACT MITIGATION

CPDA is addressing EPA's proposed restrictions affecting farmers by promoting Drift Reduction Adjuvants (DRAs) as a mitigation strategy, ensuring agricultural sustainability.

USDA RESOURCES FOR GROWERS

CPDA collaborates with USDA to provide growers with resources through conservation plans, enabling access to NRCS funds like EQIP, and promoting conservation practices.

INNOVATION BACKLOG

CPDA advocates for increased funding for the EPA's Office of Pesticide Programs to address the regulatory backlog and ensure farmers have access to essential crop protection tools.

FARM BILL

CPDA is advocating for a Farm Bill that includes incentives for adjuvant use, educational programs, research funding for adjuvant application excellence, and expanded access to NRCS Technical Service Providers.

Through these efforts, CPDA aims to enhance agricultural productivity while addressing regulatory challenges and supporting resource efficiency.

BECAUSE ADVOCACY MATTERS

PROVIDING SOLUTIONS THROUGH AGROTECHNOLOGY

Based near Washington D.C., CPDA has been the voice and advocate for the adjuvant, inert and post-patent crop protection industry for almost 40 years. Nearly 90% of the U.S. crop protection market are CPDA members. The association members are a network of basic inert manufacturers, adjuvant formulators, distributors, retailers, US pesticide formulators, and generic crop protection registrants and manufacturers who make their voices heard by working together.
