Michelle.Emery@ascension.org

Learning Objectives:

1. Provide an overview of Michigan Automated Prescribing System (MAPS), including utilizing the system's updated features effectively and appropriately employing system features in clinical practice.
2. Discuss how integration between prescription drug monitoring systems and electronic medical records occur and what resources are available to facilitate this integration.
3. Describe the impact utilizing MAPS has on the opioid epidemic.
4. Explain the implications of MAPS legislation on the prescribing community.
