Heat

History:

Roman Culture, The city of

Hello, 3B Parents!

This week's newsletter contains information for the short week before Thanksgiving, as well as the projected content for the following week. There will be no newsletter next week.

We are working hard in 3B on our Multiplication facts and Division problems. Please practice with your scholar on their Multiplication facts up to ten. We are currently practicing two - digit and three - digit number Division problems. Once everyone has mastered their Multiplication facts it makes learning how to do division problems so much easier.

I hope everyone has a restful and wonderful Thanksgiving Break! I am thankful for all of you and your students.

As always, feel free to email aredd@archwaynorthphoenix.org with any questions or concerns.

Yours in the pursuit of Truth, Goodness, and
Beauty,

Ms. Redd and Ms. Ramasubramanian

VIRTUE CORNER:

This week we had a long conversation about **Kindness**.

We have twenty-nine students in our class and every single one is different from their neighbor. Because of this, it is common to encounter people that we don't understand. Sometimes we fear or don't like things we don't understand.

How do we respond? How should we treat people who are different than us? Why does this matter?

We had a heart-felt discussion around this, and I was tremendously encouraged by the thoughtfulness with which the students engaged in our talk. I look forward to seeing changes in the culture of kindness in our class.

Will you partner with me in continuing this conversation with your student at home?

LOOKING AHEAD:

November 27th – Half Day

November 28-29th – No School

December 18-20th – Half-Days

December 23rd – Jan. 3rd – NO SCHOOL

January 6th-8th - Conferences

Weekly AZM2 Tip:

Here is a Khan Academy video introducing long division. Use it as an alternative resource when helping your student at home.
