Two-Step Word Problems,
Multiplication

Science:

Simple Machines

History: The Beginnings of
the Roman Empire

Hello, Third-Grade Families!

We have made it through the first quarter! Your scholars have learned so much already, and we have enjoyed watching them grow in virtue as well as knowledge.

Your lead teachers and assistant teachers are looking forward to meeting with you at your scheduled time for a Parent-Teacher conference. We ask that you arrive on time, even a few minutes early, and please be sure to finish the conference at the scheduled ending time. Conferences are back-to-back and running over would mean cutting into another parent's time. We encourage you to prepare a list of questions or concerns beforehand to make the most of your time with your teacher.

As we begin the second quarter, your scholars will be learning multiplication. It is difficult to overstate the importance of multiplication as it undergirds so much of what we will be learning the rest of the year, including division and fractions. **It is paramount that your scholars memorize their multiplication facts so well that their recall becomes automatic. We will be practicing them in class, but we strongly encourage every family to supplement this at home with flash cards, skip-counting songs, and of course, Rocket Math every night.**

Yours in the pursuit of Truth, Goodness, and Beauty,
Mrs. Daglow, 3D Lead Teacher

"If we encounter a man of
rare intellect, we should ask
him what books he reads."

— Ralph Waldo Emerson

Important Dates:
