Dear Healthcare provider and/or Community Champion,

Ohio University Heritage College of Osteopathic Medicine (OU-HCOM) Community Health Programs (CHP) develops and delivers quality health care services for children and adults throughout southeastern Ohio through a stationary and mobile clinic. Our services were initiated in response to unmet health care needs and are often geared toward clients and patients who lack adequate medical alternatives. As part of our services we offer free breast and cervical cancer screenings for uninsured, insured and under-insured women. The goal of the program is to decrease late-stage breast cancer diagnosis rates by offering breast health education, breast cancer screenings, clinical breast exams, mammogram referrals, gas cards, breast diagnostic referrals and navigation. Our services are funded and supported by Susan G. Komen Columbus.

In an effort to work more closely and efficiently with local health care providers and community members, our program has initiated a Breast Health Advisory Committee. I am reaching out to you as a health care provider or community partner to invite you to join us for the first committee meeting on **June 14, 2017 @ 1:30pm located at Garnet A. Wilson Public Library 207 N. Market St. Waverly.** Included with this letter is a flyer that provides information pertaining to our breast and cervical cancer screening clinics. Please feel free to share this valuable information with those in need of resources. With your support we can reach women in need in Southeastern Ohio communities and provide them with the necessary preventative screenings.

On behalf of OU-HCOM CHP staff, we would like to thank you in advance for your interest and support in helping to share available resources and services to those in need. **Your RSVP to our invite would be appreciated.**

Sincerely,

Carrie Johnson, RN, Nurse Coordinator, Email: johnso8@ohio.edu

Crystal Haning, LPN, Community Outreach Coordinator, Email: haningc@ohio.edu
