

BACKYARD COMPOSTING WORKSHOP

Food scraps, yard clippings and other organic materials make up 40% of the waste stream.

Composting reduces this waste and turns it back into valuable soil nutrients to produce healthier plants.

Parents and Grandparents bring your Children and Grandchildren along; we will be sponsoring a children's composting class along with the Adult class.

This is a free workshop sponsored by:

**THURSDAY
AUGUST 15, 2019**

Adult and Children's Workshops
