## Help us enhance safety awareness in worksites

MCA Alberta is currently developing a safety education program for mechanical contractors in both the commercial and service sectors. We need your help.

We are looking for common photos of worksites that your employees encounter on a regular basis. Worksites where they are required to make appropriate, on-the-spot safety related decisions. The content of the worksites will remain anonymous and photos will be used for training purposes. Also, please stay tuned for a survey coming regarding safety at your company.

Our intent is for these photos to be used for future safety training purposes and will, once the safety program is developed, be made available to MCA members for your employee training. Please note that privacy of projects, jobsites, and companies will be protected so they are not divulged in any training materials.

Please have your supervisors, project managers and service technicians take two photos of worksites this week, just two, and send them to [info@mca-ab.com](mailto:info@mca-ab.com)

These photos will help MCA evolve into an industry with well defined and integrated safety culture.
