

MCA e-jobsite journal is here

MCA is proud to announce that our new e-jobsite journal is now available! This e-jobsite journal keeps all of the same information as the daily hard-copies but also includes additional features and reporting capabilities.

Features include paperless daily reports that are automatically time-stamped with the current time, date, and weather details. Plus, submissions are in real-time.

Employees can also upload pictures from the jobsite to their daily reports. Once the daily journal is completed, it is saved and signed off with a username and password. It is then ready to be submitted to the safety officer or supervisor. Additional features include customizable checklists to use internally by safety officers or supervisors.

Pricing for members:

A one-time company set-up fee of \$50 and an annual fee of \$20 per employee.
