The MCA would like to offer our services and assistance to help you achieve your Gold Standard designation by March 31

The MCA committee responsible for the development of the MCA Gold Standard Service Contractor designation met this week to review progress toward meeting its goal to have 15 MCA member companies achieve their Gold Standard Service Contractor designation by March 31, 2018.

We are close! But to get there we need your company to complete its final steps toward achieving its Gold Standard designation. If there are obstacles standing in your way, we may be able to help. Please don't hesitate to ask for our assistance!

The March 31 deadline is important because on April 15, MCA will be reaching out to BOMA, BOA and IFMA to roll-out the MCA Gold Standard Service Contractor program to their individual members. We need a critical mass of Gold Standard companies listed on the MCA website that will meet the Gold Standard level of service delivery.

We think your company should be on that list. Members of BOMA, BOA and IFMA were involved in development of the Gold Standard program and as such, going forward from April 15, Gold Standard Service Contractors will receive a higher rating in service contract bid documents. There will be real value attached to your Gold Standard designation!

As the Gold Standard program grows and develops, the value proposition of the Gold Standard designation will increase exponentially and likewise the qualification criteria will be an ever-higher standard to achieve. The next 30 days are the optimum time for your company to become a Gold Standard Service Contractor.

For detailed information on what is required to achieve your Gold Standard Service Contractor designation, go to: <http://servicecontractor.ca/wp-content/uploads/sites/5/2014/11/MSCC-Gold-Standard-Contractor-Application-2017.pdf>.
