

# CONFIDENCE IN CANADA

## AT STAKE IS MORE THAN A PIPELINE PROJECT

More than 100 business, labour and community organizations across Canada signed an open letter to Prime Minister Trudeau calling upon the federal government to ensure the Trans Mountain Pipeline project proceeds without delay.

We are deeply concerned that a project which has undergone a thorough and rigorous regulatory review, including years of consultations, and was given the green light nearly two years ago, is now in jeopardy.

The global reputation of our country as a safe and secure place to invest and to do business is at risk.

Investors and businesses, large and small, need to have confidence that when they work to meet the regulatory conditions and obligations, and are approved, that government lives up its word.

We need an immediate resolution to this impasse. We are calling on our national and provincial leaders to look for ways to move forward and get this project built, including expand if necessary the Oceans Protection Plan. Do what it takes to provide the leadership required to build confidence in Canada and our reputation as a place to do business and grow our country's prosperity.
