

LIVING PERFORMANCE

Armstrong Fluid Technology, in association with the Mechanical Contractors of Alberta, is pleased to invite you to attend a very special symposium for achieving lowest first cost and lowest lifecycle cost by using the latest innovative HVAC technology and pump design.

This seminar will be held November 15th at the Courtyard by Marriott Edmonton Downtown. Attendees will be introduced to Design Envelope as an industry-leading HVAC technology and

will have the opportunity to learn how it can be applied to fluid flow systems for optimum energy efficiency that meets today's as well as future energy codes.

EDMONTON

NOVEMBER 15, 2017

VENUE

Courtyard by Marriott
Edmonton Downtown
1 Thornton Court, Edmonton

AGENDA

- Introduction to Environmental Sustainability, design trends and new technologies for efficient buildings.
- Next generation pumping innovation: how Design Envelope Sensorless technology helps achieve high energy performance and innovative building design with lowest installation cost.
- Performance Management: how new innovative technology helps maintain optimal long-term pump efficiency and overall performance.

Attendees can earn **three Professional Development Hours** from these approved presentations.

GUEST SPEAKER

Justin Pockar

Energy and Environmental Coordinator
- Calgary Building Services

National energy code for buildings.
How the Performance Path helps engineers, contractors and owners achieve world-class efficient buildings design.

Registration begins at **3:00 PM**. Presentations will begin at **3:30 PM** and will conclude at approximately **5:45 PM** followed by dinner.

We look forward to seeing you November 15th!
