10DP Waist 28-44, even sizes only

05

UniFirst facility service customers use less water, chemicals, and labor to clean their facilities. That's good for the environment and the bottom line.

Floor Mat Service

All of our UniFirst-made floor mats, from decorative carpet-tops and nitrile rubber scrapers to anti-fatigue mats, are designed for commercial foot traffic, and trap and hold dirt, dust, and moisture better than the alternatives. With UniFirst scheduled floor mat service, all soiled mats are picked up and replaced with hygienically clean ones. Our full-service program enhances your facility's appearance and your business image. And to address your facility safety concerns, all of our floor mats are certified as "high traction" by the National Floor Safety Institute (NFSI).

Microfiber Mops & Wiper Service

UniFirst microfiber cleaning solutions support your contamination control goals. Our advanced microfiber mops, dusters, scrubbers, and wipers can be used wet or dry and allow you to clean faster with less water and chemicals. The super-absorbent fibers found in our microfiber products hold six times their weight in water, making them more absorbent than conventional cleaning products. Positively charged fibers attract and hold dust like magnets, allowing them to capture even the smallest of dust particles and germs. Using only water, microfiber cleaning products are proven to remove up to 98% of bacteria and 93% of viruses from surfaces.* UniFirst's regular pickup, delivery, and laundering service means you'll never run out of clean microfiber.

*Tests performed by the U.S. Environmental Protection Agency. Published in *Environmental Best Practices for Health Care Facilities: Using Microfiber Mops in Hospitals*.

Regular weekly service ensures you have what you need, when you need it.

Hand Care, Soap & Sanitizer Service

UniFirst has teamed up with GOJO,[®] the best name in the hand care industry, to offer you a wide array of hand care and hygiene solutions that fight germs and help reduce cross-contamination.

Our dispensing systems are available in automatic “touchless” and traditional manual dispensing options that provide efficient portion controls resulting in less waste. For ease of use and to safeguard against contamination, our snap-in-place refill containers are also factory-sealed.

PaperTowel & SanitaryTissue Service

To provide sustainable restroom cleanliness and hygiene solutions, UniFirst supplies TORK[®] towel and tissue products by SCA, which are Green Seal[™] and EcoLogo[®] certified and manufactured from base paper that is 100% recycled.

Portion-controlled paper dispensing systems reduce waste and come in traditional and “touchless” options. Easy-to-refill designs also help reduce maintenance time and costs.

Air Freshener Service

UniFirst offers environmentally friendly air freshener systems that neutralize odors at the molecular level, eliminating unnecessary chemical “masking” that could affect air quality. All of our odor control products meet stringent clean air standards and dispense fragrance in accordance with guidelines established by the International Fragrance Association to protect the environment and human health.

Our most popular air freshener system, TCell,[™] provides the perfect environmental solution because it does not contain propellants or added VOCs, its components are all recyclable, and the standard dispenser requires no batteries.

We also offer a complete line of restroom products and services not shown. Just ask your UniFirst representative about other facility service options.
