

## Aliso Canyon Disaster Health Research Study

In response to requests from community members, we are pleased to inform you that the deadline for public comments for the Aliso Canyon Disaster Health Research Study Draft Goals and Priorities has been extended to **Friday, April 30, 2021 at 5pm**.

The Health Study is a community and science driven effort, and it is important that community members provide input on the draft Goals and Priorities. It is our hope that the additional two weeks will provide community members with the time needed to submit comments.

There are two ways you can submit input, email your comments to [AlisoStudy@ph.lacounty.gov](mailto:AlisoStudy@ph.lacounty.gov) or provide comments through our [online form](#). If submitting your comments via email, please consider reading instructions on a [guide for submitting email responses](#).

Your input is valued and will help inform the SOC about what is *most* important to the community for the Health Research Study.

Please reach out to us with any questions at [alisostudy@ph.lacounty.gov](mailto:alisostudy@ph.lacounty.gov).
