

paid Teacher Workshop

Join us at Delaware Tech for the STEM Educator Energy Institute; a three-day workshop on data analysis, energy efficiency and solar photovoltaics. High School Teachers will get hands on experience with industry tools and leave with resources (including lesson plans) to take directly back to your students! The hands-on classroom lab activities will enable you to bring renewable energy, energy efficiency and data analysis to life in your classroom.

TUESDAY, JULY 18TH – THURSDAY, JULY 20TH, 2023

Delaware Technical Community College
Dover, Delaware

RSVP: JENNIFER CLEMONS | JCLEMONS@DTCC.EDU
