July 11, 2017, 9:30 AM – 12:30 PM
Washington, DC

Nicolas Garcia Mayor is the CEO & Founder of Cmax System.

Nicolas is an entrepreneur and industrial designer focused in humanitarian development, social innovation and environmental preservation. He is also the Co-Founder and President of 8 NGOs and social benefit organizations. He worked and lived in Europe conducting various architectural and innovation design projects. Since 2000 he has been working as an Industrial Humanitarian Designer, identifying, designing, developing and implementing innovative solutions in countries in South America and abroad, including China, Austria, Spain, France, United Arab Emirates. Today, his designs travel around the globe and have been showcased in many countries. Among other recognitions, in 2014 he was awarded by JCI with Ten Outstanding Young Person of the World TOYP for his contribution to children, world peace and human rights. With his humanitarian innovation called Cmax System, he was invited to present in the 68th the United Nations General Assembly UN in New York City.

About Cmax System and the Virtual InvestDC Opportunity. Cmax is an Emergency Shelter System Prototype that provides immediate housing for refugees. It is created to dignify and improve the quality of life of people made homeless by large-scale movements of people, Wars, Natural Disasters such as, earthquakes, cyclons, tsunamis, slandslide, heavy rainfall, and others Complex Emergency. The innovative design was awarded for the most important humanitarian organization worldwide. The company is located in Washington DC and for more information go to www.cmaxsystems.com

Luigi Leblanc, Vice President of Technology, Zane Networks.

Mr. Leblanc possesses a two-tiered background as an engineer and a public health professional with over 15 years of experience in health information technologies spanning from telehealth, electronic health records and mobile health solutions. As the Vice President of Technology for Zane Networks, he has led the implementation of many projects that require the collaborative efforts of a diverse cross-section of healthcare stakeholders including health networks, payers, hospitals, physicians, consumer groups, state regulators, security organizations and technology developers and vendors. Mr. Leblanc has led health information technology research initiatives that focus on patient self-management of chronic diseases through personalized web portals, combining social media concepts, e-learning, online collaborations, Electronic Health Records and Patient Health Records. He is also a Certified Professional in Health Information Technology (CPHIT) and is a member of the District of Columbia HIE Governance Committee. He serves a Commissioner of the Electronic Health Record Accreditation Commission (EHNAC), a federally recognized, standards development organization accrediting body designed to improve transactional quality, operational efficiency and data security in healthcare. In addition, Mr. Leblanc is an active member of the Health Information and Management Systems Society (HIMSS), the American Telemedicine Association (ATA) and the American Public Health Association (APHA).

About Zane Networks, LLC and the InvestDC Opportunity. Founded in 2000, Zane Networks, LLC (ZaneNet), is located in Washington DC, serves public and private entities by solving complex problems in the areas of health information technology, healthcare management and consulting, software and application development. ZaneNet will present their Chronic Disease Patient Web Portal (PWP) which is an online mobile application and web portal that is currently being used at the Diabetes Treatment Center (DTC) at Howard University Hospital. It serves as an online communications tool, linking patients to the DTC team to better facilitate coordinated care and diabetes self-management. Using this tool patients can securely message their health care provider, request prescription refills, check their appointment status and access accurate and reliable library resources related to their diabetes care.

The DTC mobile application increases user interaction with their care team by providing quick access to messages sent from providers directly on the users' mobile desktop. It equips users with the ability to view, search/filter, send, receive and reply to messages. However, unlike email, messages can only be exchanged between contacts in a strictly-maintained address book of Direct-compliant participants - and who are within the immediate, authorized care-coordination circle. The mobile app is created initially for the Android and Apple iOS operating systems. This covers the vast majority of the mobile devices widely available to consumers. As more user platforms are available, other mobile devices will be able to access a secure mobile web app, with slightly reduced functionality. www.zanetworks.com

Adam Segal is the CEO & Co-Founder of Cove.

Cove is a D.C. startup building a network of neighborhood workspaces powered by a tech platform that connects people to their work experience. In three years, cove has gone from a business plan to a multi-city company with thousands of users, \$6.75mm in venture capital raised, and a team of 40+ people. Previously, Adam worked in consulting, technology, and investment banking - and never much enjoyed working from a cubicle. He holds a BA from Amherst College, an MBA from Northwestern's Kellogg School of Management, and an MPA from Harvard's Kennedy School and is Cove's own worker bee.

About Cove and the InvestDC Opportunity

About the InvestDC Opportunity? We started cove so you have a place to get things done - a workspace with friendly faces just around the corner in your neighborhood. We built a network of coves so you can find a productive oasis no matter where you are in the city - just pull up your phone and explore our locations and the people in them. The future of work is happening today and cove is leading the charge; cove has been featured in the BostonGlobe, YahooNews, the Washington Post, the Washington Business Journal, NPR as well as many other media outlets and publications. We will be conducting a Series B equity capital raise in the late fall to drive location and market expansion. <https://www.cove.is/>
