

## MEC-Leesburg member launches travel app

Mark My World, a travel technology company based at MEC-Leesburg, launched their app June 17, 2016. This revolutionary platform allows users to collect and share the places they love with the people they care about. No other software exists that allows the integration of points of interest, journals, itineraries and the ability to share these items with friends and social media. Founding Partner and President, Janine Rethy said "We have been fortunate that Loudoun County SBDC and Mason Enterprise Center in Leesburg have given us the tools and support for us to take our idea to reality." Mark My World plans for this app to be a must have for travel planning, blogging, and experience collecting all over the globe.
