

MEC-CBP Springfield Incubator Client Wins Multiple Contracts

CAIRD Sextant LLC is a minority owned Small Disadvantaged Business established in October 2013 by Dr. Rafael A Olivieri with the goal of providing the best Environmental Security and Management support to government and commercial clients.

This past June CAIRD Sextant completed a \$16k subcontract to BMT Designers & Planners, a multi-disciplinary consulting firm that provides engineering and technical services for commercial and Government customers, with an emphasis on our core expertise in the maritime and environmental sectors.

On August 2nd they signed a Fixed Firmed Price Contract as a subcontractor to HDR, (<https://www.hdrinc.com/>) a premier architectural, engineering, and consulting firm who has a large contract with the US Navy. The contract with HDR is for \$275K and will take place from August 2018 to September 2019. CAIRD Sextant will provide support to the Chief Scientist for Environmental Support during the 2020 Full Ship Shock Trial of the new Aircraft Carrier (CVN 78) Gerald Ford. After this contract is complete, there is potential for CAIRD Sextant to secure funds at similar value for a follow up task for the next fiscal year starting October 2019.

Additionally, in June CAIRD Sextant submitted a proposal to the new Navy Seaport NextGen, a multiple award contract (MAC), to support engineering and program management task for the Navy. The Navy will inform sometime in the Fall the companies selected for this MAC.

Congratulations to CAIRD Sextant and Rafael on securing these contracts and best wishes to you this fall as you wait to hear back about the Navy MAC!
