The COOLEST.

Pennsylvania Hardwoods Leads the Nation

#1 in hardwood growing stock ~ **#1** in production of hardwood lumber ~ **#1** in wood product exports

Pennsylvania's Sustainable Forest Resource

Over 16.6 million acres – almost 60% of PA; more acres than 100 years ago with 70 percent privately owned.

PA's forests are growing at 2-3 times the harvest rate.

Hardwood trees naturally regenerate meaning they are considered a renewable resource.

Sustainable harvesting creates healthy forests, improves carbon capture, and offers improved wildlife habitat, clean air and water.

Wood products store carbon for the life of the product.

When a tree is harvested, every part of the tree is used.

Pennsylvania's Forest Products Industry

Employment:
Over 60,000 Pennsylvanians
Over 10% of PA's mfg. workforce

Output (sales):
$11.5 billion annually

Businesses:
Over 2,000 establishments across all 67 counties

Total Economic Impact:
Over $39 billion annually – the largest sector of Pennsylvania Agriculture!

Hardwood Products

Beautiful
Hardwood's authenticity elevates any design style.

Durability
Wood outlast wood look-a-like products.

Healthy Home
Research shows that hardwood floors, cabinets and furniture have a positive impact on your mood, stress levels and overall mental health.

Lifetime Value
The return on investment rivals all alternative materials.

Sustainability
The production and processing of wood uses much less energy than other building materials like plastic, glass, aluminum & steel.
