

Healthy Homes Principles for Home Visitors/Staff

March 1 or April 18, 2019

9 am-4 pm

**eitas Training Center
8508 Hillcrest Rd
Kansas City, MO**

**Participants will learn the essential Healthy Homes Principles for
Home Visiting Professionals**

This **FREE** one day foundation training course is ideal for anyone who provides home health services of any type. The training will help you understand the connection between health and housing, and how to identify basic housing hazards and educate home occupants on practical solutions. The goal of healthy homes training is to take a holistic approach to identify and resolve problems that threaten the health and well-being of residents. During this course we will discuss the latest knowledge about how to manage moisture and mold, pests, allergens and dust, chemical hazards and contaminants, common home safety hazards, lead-based paint, radon and asbestos. The training focuses on utilizing the eight principles of healthy housing; Keep it Dry, Clean, Pest-free, Ventilated, Safe, Contaminant-free, Maintained and Thermally Controlled. Through interactive exercises, lots of discussion, and lots of free handouts and materials, you'll have the opportunity to get all your questions answered about how to help your clients make their homes safe and healthy.
