Grief Informed and Trauma Informed Practices

Studies now show that nearly every school has children who have been exposed to overwhelming experiences, such as witnessing violence between their caretakers, being the direct targets of abuse, and other kinds of adversity that considerably impacts learning. The landmark **Adverse Childhood Experiences (ACE)** study found higher levels of traumatic experiences in the general population than previously imagined.

For Parents

For Educators

For Advocates

A background image showing a group of diverse students in a classroom setting. They are sitting at wooden desks, some using laptops and others tablets. The students appear to be engaged in collaborative learning, with some looking at screens and others talking to each other. The lighting is warm and the atmosphere is positive.
