The Facts:

Did you know, in 2021, our program will have served our region for over 37 years, impacting the health and safety of many student-athletes, some of which currently volunteer as physicians in our athlete screening program as a way to give back?

Did you know, the Jacksonville Sports Medicine Program is an advocacy program, not a clinical practice? – we do not have an office to see patients, which means our only source of income is from donations. About 75% of our operational budget is supported through our Sustaining Partners, identified below, with the other 25% coming from private donations to keep our program active. This is where you can help provide the critical support needed.

Did you know, Wolfson Children's Hospital, The Players Center for Child Health, Nemours Children's Health System, The Duval County Public Schools and the Duval County Medical Society are the "Founding Partners" of this non-profit program (1984); Brooks Rehab formally joined our mission in 2012, as we updated our major contributors to "Sustaining Partnerships" We are always looking for others to join our mission at this level, "it takes an entire community to reach all of our student-athletes"

Did you know, we save lives? As one of the flagship programs of this organization, the annual athlete screening program has served over 50,000 student-athletes since 1984. Throughout this time frame, numerous kids participating in the program have been identified with cardiac and other medical conditions that have been treated allowing these students to return to sports and mitigate the risk of catastrophic injury.

Did you know, the Jacksonville Sports Medicine Program is a unique, one-of-a-kind program in sports medicine, a true community collaborative that unites community stakeholders for the health and safety of kids participating in sports programs?

Did you know, our organization has received numerous local, statewide and national awards of distinction and is regarded as a leading organization for youth sports safety?

Dedicated to youth sports safety through awareness, advocacy and injury prevention
