Made Locally  *Spread Locally*

HoCoGro Compost and HoCoGro Mulch

Made Locally Spread Locally

HoCoGro Compost is a soil amendment made from organic materials containing nutrients vital for healthy plants and gardens. It loosens hard soils and encourages plant growth. To use, mix into soils before planting or use to top-dress lawns. \$23/cy

HoCoGro Mulch is a naturally-colored hardwood mulch. We do not use artificial colors or dyes. Our mulch is aged a minimum of 120 days and includes some leaf mix to ensure that it does not rob your plants of nitrogen. \$21/cy

Blended Topsoil is a pre-mixed blend of compost and native soils. Our mix contains 6 % - 12% organic matter and is perfect for raised beds or reconstructing lawns. \$25/cy

Our compost facility uses local feedstocks and exceeds industry standards.
Lab results for HoCoGro Compost available on website.
