Root Cause Problem Solving Workshop

Solving Problems So They Never Happen Again

**Tuesday, October 11, 2022
1:00PM-5:00PM PST**

Do you want an extraordinary day at work? One where work proceeds smoothly, and you don't have to work around constant issues and fire fight all day? A day where you can actually get work done?

Would you like to:

- Spend time and money solving the real problem?
- Unify your team around a common proven problem-solving methodology and vocabulary?
- Take the focus away from work arounds, opinion, blame and punishment; shift the focus to systemic causes, objectivity, collaboration and data?
- Enable teams to more effectively and efficiently identify true causes and effective solutions?
- Support achievement of business goals?
- Help minimize the impact of human behavior and errors?

Whether you're employed in Food Processing, Fabricating, Machining, Aerospace, or Construction, this workshop is a benefit to anyone employed in industry, manufacturing and business services, from the management and front office, through operations, to shipping, receiving, distribution and supply chain.

In this four-hour practical hands-on workshop, participants learn by helping to solve several of each other's real business issues. Root Cause Problem Solving templates are provided as a guide for facilitating a team - for use in this class and for future use in your workplace.

Instructor:

Ileana Vassiliou, Creating Effective Organizations

Over a decade ago, and with years of experience in manufacturing, Ileana Vassiliou founded CEO to expand her sphere of influence in healing the world of work. Her consulting firm is dedicated to amplifying the capability of organizations to perform. Her mission is to guide organizations through a shift from "status quo" to "status great".
