## Join Wesco for an Industrial Automation Showcase

**Brought to you by our automation technology partners.**

This training event will be a must-attend for anyone interested in staying ahead of the curve with the latest automation trends, products and technologies.

Wesco automation specialists will provide in-depth training on the newest products and technologies, as well as best practices for improving your plant operations.

**Trainings include:**

- Condition Monitoring
- IO-Link
- Driving Employee Retention Through Automation Empowering the New Workforce
- Siemens S7-1200 G2 + S200/210
- Siemens Automation Framework
- Wesco Managed Solutions
- Heat Dissipation
- Intelligent Link Module

But that's not all - in addition to the classroom trainings, we'll also have an **open trade show floor featuring our industrial and automation partners**.

Following the Automation Showcase event, join the after party to continue the conversation with fellow event attendees, suppliers and the Wesco team. Enjoy complimentary drinks and appetizers and unwind after a great day of learning. Don't miss this opportunity to network and celebrate the future of automation.

### REGISTER NOW

Thursday,
September 4
8:00 a.m. to 6:00 p.m.

**Location:**
**Grand Sierra Resort**
**Reno, NV**

Free lunch, refreshments and happy hour included with registration!

If you work for the government, please determine whether your agency's policies permit you to attend this event. Click here for more details and prohibitions on training, eligibility for industry associations' continuing education credits (e.g., BICSI CECs), prizes, food or beverages.

| Time | Details |
|------|---------|
| 9:00am – 4:30pm | **Onsite Registration + Supplier Expo (all day)** - Arrive onsite at whatever time is convenient for you and head to our onsite registration desk to check-in before joining your registered training session, complimentary lunch, and/or visiting the Supplier Expo. |
| 11:30am – 1:00pm | **Lunch with the Wesco Team** - Join Wesco team members, industry colleagues and valued supplier partners for complimentary lunch, served from 11:30 a.m. to 1:00 p.m. |
| 4:00pm – 7:00pm | **Closing Remarks, and Happy Hour** - Join us for refreshments, raffle prize winner announcements and closing remarks from the Wesco team as we end the day with dedicated networking time. |

## Available Trainings

**Condition Monitoring -** Visit with Banner Engineering to better understand who is applying condition monitoring and how they are accomplishing their goals in cost reduction while increasing equipment uptime.   This will be supplemented with discussions on the technologies available and application examples.

**IO-Link -** Are you looking for a new avenue to achieve consistent cost reduction, high plant availability and transparency? IO-Link is it. Learn about open, standardized and low-cost systems for connecting actuators, sensors and other field devices to the automation system.

**Driving Employee Retention Through Automation:** Empowering the New Workforce - This session explores how automation is reshaping the employee experience by reducing labor-intensive drudgery and creating safer, smarter and more satisfying work environments. You'll leave with practical strategies and inspiring use cases for using automation not just to do more, but to do better.

**Siemens S7-1200 G2 + S200/210 -** Discover how Siemens is making motion control more accessible than ever. We'll explore the enhanced capabilities of the new S7-1200 G2 controller and how it pairs seamlessly with SINAMICS S200 and S210 servo drives to deliver precise, cost affective motion-control for low-axis, compact machine applications.

**Siemens Automation Framework -** Explore the Automation Framework (AF) — a modular and flexible TIA Portal project designed specifically for machine builders. This course introduces the core structure and capabilities of the AF, tailored for machines with medium to high-end requirements in functionality, quantity structure and performance. Learn how to leverage its pre-built software units, PLC and HMI templates and multi-language programming examples to accelerate the development of your own automation projects.

**Wesco Managed Solutions -** As part of the session, three real-world AI projects delivered by Wesco Managed Solutions will be showcased. Each example will highlight the business use case, the implementation approach and the outcomes achieved — demonstrating how Wesco is helping manufacturers adopt advanced technologies to improve performance, efficiency and resiliency.

**Heat Dissipation –** Learn about heat dissipation calculations for control panel cooling system design.

**Intelligent Link Module -** Discover the future of motor control and automation in this exclusive session featuring the all-new SIRIUS 3RC7 Intelligent Link Module (ILM) from Siemens. Building on the trusted SIRIUS Modular System, the 3RC7 ILM brings a powerful digital upgrade, offering real-time load data access, predictive diagnostics and seamless integration into your automation environment.
