

## RENTALS OVERVIEW

If your project or event lasts a few days or weeks, but less than 170 days, renting equipment is a better solution than buying your own. We have the highest-quality equipment and a broader range of products than any other company on the road. Our crews bring the equipment to the site, set it up, and take it down when the event or project is over.

Ver-Mac Solar Powered Arrowboard Trailer

Ver-Mac PCMS-320

Houston Radar Armadillo

LPR Mobile Radar System

### WHY RENT?

#### Right equipment for the job

A one size fits all strategy can cost more over the course of a project. By renting the equipment needed for specific jobs, you can ensure that you have the exact equipment needed to get the job done in a correct and timely manner.

#### Delivery to the jobsite

With a trucking fleet at our disposal, we can get the equipment you need to your jobsite, on the day that you need it. Saving time on and space on the jobsite.

#### Cost saving

By renting the equipment, you avoid the capital investment involved in buying, repairing, storing and moving the equipment from job to job. Allowing you to conserve your capital for other projects and opportunities.

#### Increase your borrowing power

Renting equipment does not show as liability on the balance sheet. Which will allow you to show better assets to liabilities ratio.

#### Complement your existing fleet

If you already own some equipment, renting will allow you to fill in the gaps on those projects where your existing fleet just might not be the right equipment for the job.

## ON-STREET SERVICES

Our On-Street Services team devises, implements, and manages work areas for construction, emergencies, maintenance, and special events. This service allows our clients to focus on what they do best, while we take care of traffic control logistics. These services include the coordination and installation of equipment by our team of certified Worksite Traffic Control technicians.

Every component of a traffic accommodation strategy can be handled by our On-Street Services team, including:

- Lane Closures & Detours
- Equipment Deployment
- Product Sales & Rentals
- Flagging Services
- Equipment Maintenance
- On-call Service
- Installations
