◆ GOVERNMENTAL STANDARD:

Motorgraders

HIGH-CARBON

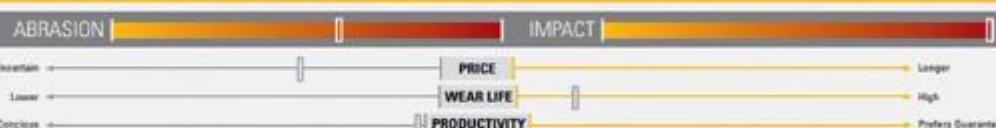

- Balance between convenience and reliability at an affordable price.
- High-carbon edges have good surface hardness, perform in high-abrasion, construction.
- Well suited for finish grading, snow removal.

STANDARD EDGES (CURVED, FLAT, SERRATED)

- Cat® DH2 through-hardened steel edges offer high-impact resistance
- Available in variety of shapes, thickness to fit every application.
- The best durability, longest wear life and most options.

CARBIDE EDGES (INSERT, OVERLAY)

- Combine through-hardened steel with wear resistance of tungsten carbide.
- Used in high-abrasion, moderate-impact applications, they can provide up to 20 times the life of a standard through-hardened edge.

ROTATING BITS

- Individual tungsten carbide tips form a serrated edge to penetrate/lift snow, ice, dirt and gravel.
- Designed for high-production road applications, can outperform steel blades and last 5-10 times longer.
- Ideal for dirt and gravel reclamation, snow and ice removal.
