

S.B.-90 Road Dust Suppressant

Manufactured and Distributed Exclusively by Sands Dust Control!

WWW.SANDSDUSTCONTROL.COM - 403-728-2344 - 36330 Rng Rd 45, Red Deer County, AB T4G 0N1

PRODUCT INFORMATION: S.B.-90 is a high asphalt, **non-emulsified**, cold mix, maintainable road oil. The high density of the product requires that it be contained in heated storage to maintain workable viscosity.

APPLICATION RATE: Approximately 4 litres per square meter based on a loose 2" lift of 3/4" road gravel. The application rate may vary up or down with the characteristics of the aggregate. At this rate, a 42,000 litre load will treat approximately 1300 meters x 8 meter top.

APPLICATION PROCEDURE: Applied with a distributor and mixed in place with motor graders. Packing is optional but rubber wheeled packers are recommended. May be followed with drum rollers.

**Ideal for oilfield, gravel, and
construction haul roads!
Reworkable, maintainable,
long-lasting and durable
SB-90 Road Dust Suppressant!**

We also sell Calcium Chloride for roads and equestrian facilities!
