Epicor Releases BisTrack Delivery Application for Apple iOS in North America

Popular Delivery Verification App Now Available for Apple Devices
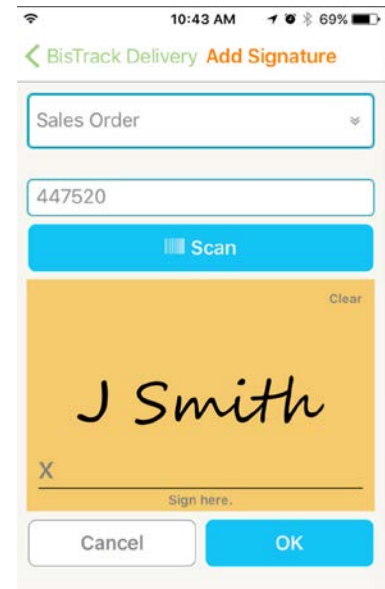

Epicor Software Corporation, a global provider of [industry-specific enterprise software](#) to promote business growth, today announced the immediate availability of Epicor® BisTrack™ Delivery software for Apple iOS™ in North America. Designed to quickly and easily capture proof of delivery information for lumber and building materials (LBM) distributors and dealers, BisTrack Delivery software is now available for Apple handheld devices, such as the iPhone®, iPad® and iPod touch®.

iOS and Android™ are the most common mobile operating systems. According to a recent study by [Kantar Worldpanel](#), these two operating systems accounted for 98.4 percent of all smartphone sales in the U.S. in the fourth quarter of 2016[1].

"Different LBM dealers have different policies for providing smart devices to their mobile workers. Some dealers provide their drivers with particular smartphones, mini-tablets or tablets, while others encourage their drivers to use their personal devices," said Kevin Hodge, director of product development and product management, Epicor Software. "As a result, Epicor is working to offer our mobile solutions for both Android and iOS with a responsive design that fits devices of any size."

Epicor BisTrack Delivery software allows drivers to use their smartphones or tablets to take pictures of the delivered items on a jobsite, log the time and location of the delivery, capture client signatures and automatically update order status in real time. These features are delivered via a simple and intuitive interface that requires minimal training.

"BisTrack Delivery is a tremendous asset every time there is a question with an order because it provides clarity to the location and condition of every delivery. With this solution, we can easily and

" BisTrack Delivery is a tremendous asset every time there is a question with an order because it provides clarity to the location and condition of every delivery."

confidently respond to every concern and build goodwill with our customers when we help resolve an issue," said Bob Sanford, president, Sanford & Hawley.

Epicor BisTrack Delivery for iOS can be downloaded for free from the Apple App Store®. It is compatible with all iPhone, iPad, and iPod touch models running iOS 10.0 or later. An Android version is also available and can be downloaded from Google Play.

About Epicor BisTrack

Epicor BisTrack is designed to help dealers and distributors of lumber, building materials and construction supplies better manage all aspects of their businesses, optimize operations, propel opportunities, and enable employee mobility. The software creates efficiencies in workflow by improving the flow of information from the supplier to the customer, and offers powerful and flexible business intelligence tools for better forecasting and decision-making. Visit the Epicor BisTrack solution hub to learn more.
