DRG Learning Agenda Overview

DRG LEARNING AGENDA OVERVIEW

The DRG Learning Agenda is a set of priority and strategic research questions for which the DRG Center generated evidence and produced recommendations to guide DRG programming, rooted in five cross-cutting thematic areas. This evidence includes academic research, program evaluations, and multi-method tests of DRG program assumptions and theories of change. The 2016 and 2017 Learning Agendas included 20 Learning Questions across five themes: Participation and Inclusion, Transparency and Accountability, Human Rights, DRG Integration, and Theories of Democratic Change.

The DRG Center formulated the DRG Learning Agendas through a consultative process with internal Theme Teams and USAID field staff. The Center created action plans for each question and a Learning Agenda Advisory Group to oversee annual updates to the agendas. The Center then funded evidence reviews along with research and evaluation activities to fill evidence gaps.

In preparation for the 2021-2023 Learning Agenda, USAID reviewed past research supported by the DRG Center and assessed the degree to which the questions from the latest agendas were addressed (see [Learning Overview](#)). This process included a compilation and summary of research including findings, conclusions, and recommendations (see [Learning Agenda Back-Up](#)).

DRG LEARNING THEME: Human Rights

The DRG Learning Agenda is a set of priority and strategic research questions for which the DRG Center generated evidence and produced recommendations to guide DRG programming, rooted in five cross-cutting thematic areas. DRG research on Human Rights answered questions related to what makes human rights awareness campaigns successful, in what contexts does assistance and others.

For more information, see the [DRG Learning Agenda Overview](#) and the [Learning Agenda Evidence Back-Up](#).

Information Campaigns

- The success of awareness campaigns tends to depend heavily on specific, targeted, and contextualized framing for messages, as well as the combination of traditional and new media to disseminate these messages.
- In addition to the benefits that awareness campaigns may achieve through pressure on governments to respect human rights, they may also spark backlash, confusion, demonization, and/or frustration.
- In some cases, awareness campaigns may find it more effective to target influential corporations in addition to the broader public.

In what ways are human rights awareness campaigns successful and what are their unintended negative consequences?

The Learning Agenda Questions Paraphrased

- ✓ What enables civic and political participation in countries where civil liberties are being taken away?
- ✓ What strategies can civil society actor and groups use to safely and successfully pry open or keep open civic space in backsliding regimes?

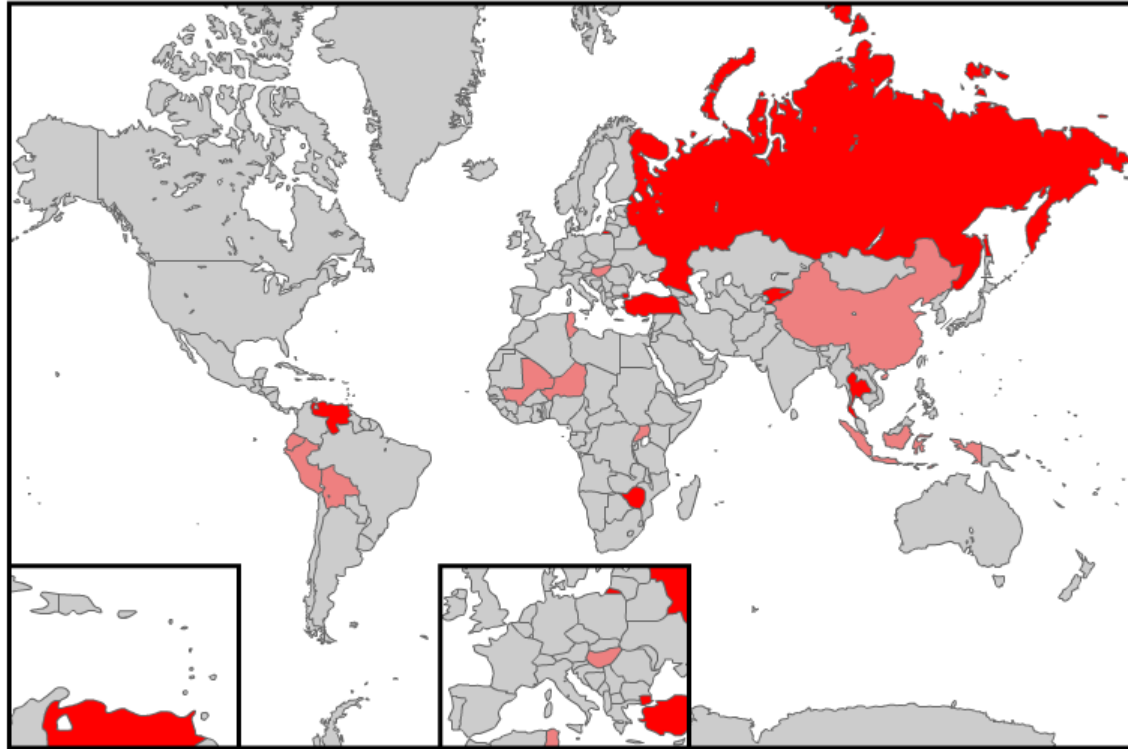

What is Backsliding?

“Change in a combination of competitive electoral procedures, civil and political liberties, and accountability... [B]acksliding occurs through a series of discrete changes in the rules and informal procedures that shape those elections, rights, and accountability” (Lust and Waldner 2015, p. 2)

Our Approach

- Case studies
- **Interdisciplinary:** Political science, Geography, Anthropology
- Mostly regional
- But special thematic foci on women and LGBT groups, NGOS, and opposition parties.
- **Regions covered:**

INCREASING REPRESSION AND GOVERNMENT CONTROL

- ✓ Cooptation
- ✓ Government control over media
