

| How to Use Your Health Savings Account (HSA) Funds to Pay for Long Term Care Insurance Premiums |

You can use money from your HSA to pay for your LifeSecure long term care insurance. This is a great way to use pre-tax dollars to pay for coverage.

Here's how it works...

Your long term care insurance premiums will be paid directly to LifeSecure Insurance Company via one the following methods:

1. direct billing (mail)
2. monthly electronic funds transfer
3. automatic payment using a credit or debit card **not** tied to your HSA
4. automatic payroll deduction (applicable only for participating employers)

If you choose to pay via method 1 or 2, you may pay using funds directly from your HSA (using your HSA checkbook or account #).

If you choose to pay via method 3 or 4, you cannot pay directly from your HSA funds, but you may reimburse yourself for long term care insurance premiums paid using funds from your HSA. Simply write yourself a check (or checks) from your HSA, or use whatever means your HSA provides to withdraw funds for the dollar amount you wish to be reimbursed.*

** NOTE: The amount you are allowed to reimburse yourself for qualified long term care insurance premiums depends on your age. See below for maximum reimbursement amounts:*

| Attained Age Before Close of 2021 | Maximum Reimbursement Limit from HSA |
|--|---|
| 40 or less | \$450 |
| More than 40 but not more than 50 | \$850 |
| More than 50 but not more than 60 | \$1,690 |
| More than 60 but not more than 70 | \$4,520 |
| More than 70 | \$5,640 |
