

We invite you to participate in our USDA-NRCS funded research titled: “*To improve natural resources conservation stewardship in rice production through the best management of water resources*”

We seek information that can help understanding:

1. Texas Rice as a cultural heritage of Texas
2. Texas Rice as a way of life
3. The complexity of rice cultivation and its effect on local and regional natural systems
4. Identify paths to make Texas Rice locally and regionally known
5. Understand the economic, cultural, social and environmental scenario of “*What if there is no Rice in Texas.*”
6. Improve the social-ecological understanding of rice cultivation across multiple boundaries
7. Seek adaptation pathways to pressing urban, economic and environmental pressures

We are seeking participants who would take part in meaningful discussion, and/or would allow visits to cultivated farms, mills or other sites relevant to rice production.

If you have an interest in taking part in this study, please contact:
