

**Huge selection of OEM parts
Highest Quality Chrome
Complete Exhaust Solutions**

3/6/23

For Immediate Release

Grand Rock heatshields have been broken down to be purchased by individual items since 2020. In the past Grand Rock offered complete heat shield kits where you would receive a guard and 2 brackets in 1 box. Listening to our customers over the years, many have preferred to purchase these parts separately to minimize potential damage to the heat shield itself, along with preventing the opening of the pre-packaged units to swap out the brackets or selling the shield separately while in store. Purchasing the pieces separately can save you and your customer an average of over \$20! Grand Rock will continue to offer the complete heatshield kits. However, effective 4/1/23 these will be converted to custom, made-to-order, and priced accordingly for the additional labor to protect and pack the bracket & shield together.

We thank you for your understanding and continued business.

The Grand Rock Team
