

## **THE COMPLETE SPORTS CONSTRUCTION SOLUTION**

Hellas Construction is the complete, one-stop solution for sports surfaces and construction, offering long-term durability and unparalleled customer commitment. Since the company's inception, Hellas has managed to impact more than 5 million students across the nation. With clients ranging from elementary schools and local parks, to NFL teams, Hellas Construction delivers on time, every time, for every client.

## **1GPA AND THE POWER TO CHOOSE HELLAS**

As a proud pre-qualified 1GPA vendor, Hellas is able to provide 1GPA members with the power to choose our quality products and installation services. 1GPA enables its members a seamless and easy procurement process. Hellas will provide you with a detailed proposal outlining your scope of work and a competitive price all of which have been competitively and legally bid by 1GPA. Once you approve our proposal and issue a purchase order or contract, Hellas can proceed with completing the work to your complete satisfaction.

## **ONE STOP SHOP**

From product manufacturing to construction, design, and maintenance, Hellas Construction is the only sports construction company that offers every service under one roof. Years of collective knowledge and experience have led Hellas Construction to expand services from quality sports surface construction and installation, to full Design/Build projects that include field houses, concession stands, bleachers, lighting, and more.

## **CONSTRUCTION CAPABILITIES**

With more than 2,500 projects nationwide, Hellas Construction has a proven track record of delivering projects on budget and on time. Not only do we have the experience and dedication to complete your project, but Hellas has the manpower and equipment to handle over 66 projects around the nation concurrently. Hellas has over 65 specialized crews focusing on construction, turf, track, and tennis installation, design, surveying, and even after-the-sale service and maintenance. Hellas also owns more than 750 pieces of heavy construction equipment, handled by a total of 815 specialized members with decades of unique skill and knowledge in sports construction under their belts.

## **SUPERIOR PRODUCTS**

Hellas prides itself in continuing to innovate the sports construction industry by constantly developing new technologies. From the new Helix Technology for Matrix Turf, to the all-organic

Geo Plus infill, Hellas Construction is devoted to producing products that enhance playability for athletes.

## HELLAS GREEN INITIATIVES

Hellas is the industry leader when it comes to protecting the environment. We believe the next generation of sports construction projects should leave a positive impact and not sacrifice ecological or social necessities.

Hellas' in-house chemists and internal manufacturing of non-toxic polyurethanes are the foundation of our quality products. Hellas' products contain no heavy metals or toxins, providing "greener" running tracks and synthetic turf systems. Our TPS 5000 court surfacing products test excellently in solar reflectivity. They are environmentally friendly latex and water-based acrylic coatings, suitable for all outdoor sports court surfaces.

We use eco-friendly, locally sourced, recycled materials and resources: from the concrete and asphalt for parking lots and sidewalks, to our synthetic turf infills and LED lighting systems. With our exclusive REALFILL™ synthetic turf infill system, as well as our epiQ Tracks® running systems, our projects result in more than 25 million tires recycled every year. Hellas offers our Geo Plus synthetic turf infill as an alternative, made from 100% plant-based, organic materials. This combination of carefully selected, specially treated, organic coconut fibers and cork ensure the highest level of sports performance, compared to the experience on a natural grass field, and with 90% less water usage. Our effective drainage systems reduce runoff and control each project site's water balance, while our synthetic turf systems reduce water consumption for athletic and landscaping projects by up to 100%, saving millions of gallons of water every year. Hellas will use our expertise, products and technology, to help your project earn you points to become LEED certified.

Hellas Construction strives to provide the best sports surfaces, using the greenest products available and we will work with you to make sure our communities reduce their carbon footprint.
