Webinar Series

AQUA-AEROBIC SYSTEMS, INC.
A Metawater Company

APRIL - SEPTEMBER, 2023

THURSDAY, APRIL 13TH | 10:30AM - 11:30AM

"Technology Overview: AquaSBR® Sequencing Batch Reactor"

- General operation and overview of AquaSBR® Technology
- Review how nutrient removal is achieved in a "True Batch" SBR system
- Understand system components and design considerations
- Review installation profiles and featured applications
- Earn (1) Professional Development Hour (PDH)

THURSDAY, MAY 18TH | 10:30AM - 11:30AM

"Innovative Applications for OptiFiber® Pile Cloth Media Filtration"

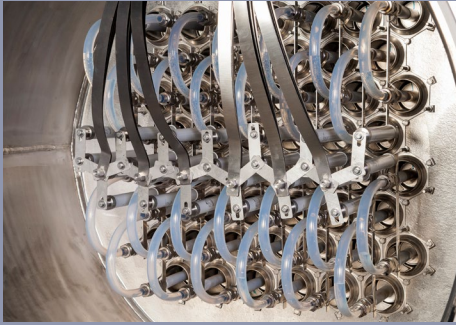

- Explore aspects of pile cloth media filtration that make innovative applications possible
- See how pile cloth media filtration is used for ultra low total phosphorus, microplastic removal, drinking water pretreatment and micropollutant removal
- Review case studies for each innovative application
- Earn (1) Professional Development Hour (PDH)

THURSDAY, JUNE 15TH | 10:30AM - 11:30AM

"Technology Overview: AquaNereda® Aerobic Granular Sludge Technology"

- Introduction to AquaNereda® AGS Technology
- Become acquainted with the operation and overall process
- Featured applications and success stories of N. America installations will be presented
- Earn (1) Professional Development Hour (PDH)

THURSDAY, JULY 13TH | 10:30AM - 11:30AM
“Ozone in IPR & DPR Reuse Applications”

- Basic familiarity with the economic, regulatory, and environmental drivers leading to increased interest in both direct and indirect potable reuse of domestic wastewater
- Insight into the differences between RO-based full advanced treatment and ozone-based alternative reuse trains
- Overview of the current status of the first-in-the-nation draft DPR regulations making their way through California, with final approval expected late 2023
- Earn (1) Professional Development Hour (PDH)

THURSDAY, AUGUST 17TH | 10:30AM - 11:30AM
“AquaStorm® Cloth Media Filtration: How Utilities Can Meet Regulatory Compliance During Wet Weather Conditions”

- Learn about regulatory requirements of wet weather treatment
- See where Cloth Media Filtration can be applied in a treatment facility or remote location
- Review case studies of operating AquaStorm® installations throughout the U.S.
- Earn (1) Professional Development Hour (PDH)

THURSDAY, SEPTEMBER 14TH | 10:30AM - 11:30AM
“AquaNereda® Installation Performance Update”

- Identify the operating AquaNereda plants in North America
- Recognize the unique characteristics and performance attributes of the presented case studies
- Describe the general approach to starting up an AquaNereda system
- Understand how performance objectives are achieved during the initial start-up phase and granulation period
- Earn (1) Professional Development Hour (PDH)
