ANNUAL ASBESTOS NOTIFICATION
FOR THE SCHOOL YEAR 2026-2027

Under AHERA (Asbestos Hazard Emergency Response Act), all primary and secondary schools are required to develop and implement a plan for managing all building materials which contain asbestos. Included in the AHERA Act is the requirement to annually notify all workers and building occupants (or their guardians) of asbestos-related activities.

Beginning in 1988, all buildings owned, leased, or "under the control of" the School were inspected by EPA accredited inspectors, with building material samples analyzed by an independent laboratory. Based on the inspection, the School prepared and the State approved a comprehensive asbestos management plan for the building.

As asbestos-containing materials are found in the building, the School has an Asbestos Operations and Maintenance program in place.

- Environmental Management Consulting, Inc. (EMC) has performed the latest 3 year reinspection document for the School in April 2025 and is scheduled again in April 2028 to review all remaining asbestos materials in the building.
- The School is continuing with the Operations and Maintenance Program as designed for the School. This ensures that all asbestos materials are kept in good condition.
- Periodic "surveillance" in each area containing asbestos will be completed every six months.
- In the past year the District did not conduct any asbestos removal

All outside contractors shall contact the lead maintenance person before commencing work in the building. Our goal is to be in full compliance with all applicable asbestos regulations.

A copy of the Asbestos Management Plan is available for review by contacting the Office. Questions related to this plan or any other asbestos concerns should be directed to the District's Designated Person Matt Adams, Maintenance Director.
