Project Overview

PROJECT LOCATION

349 Lakeview Ave, Long Beach, CA
90803

What you need to know:

- One of 26 sewer lift stations citywide
- Moves wastewater from low-lying areas to the main trunk sewers
- Prevents sewer overflows in flat and coastal areas

Background

- Built in 1929
- Rehabilitated last in 2000
- Serves ~0.15 square miles
- Receives flows from ~3.5 miles of sewer mains

Why We Need a New Lift Station

Condition Assessment Finding

- Structural Integrity
- Wet well is at the end of its useful life
- Existing station is not salvageable

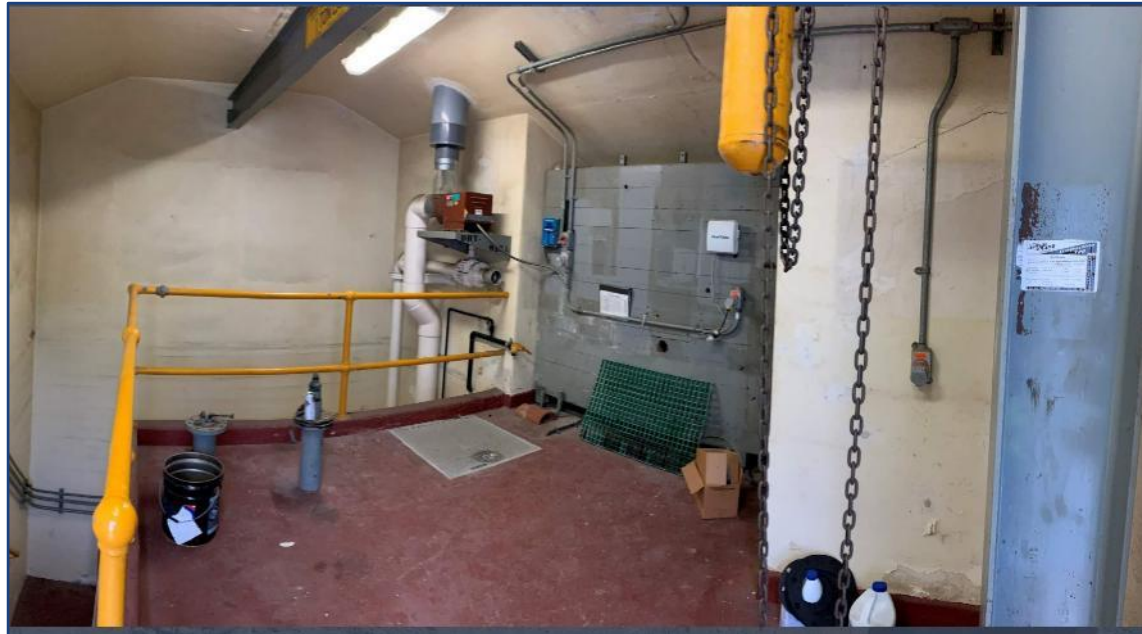

Benefit of New Lift Station

- Reduces the risk of severe overflows
- Protects water quality

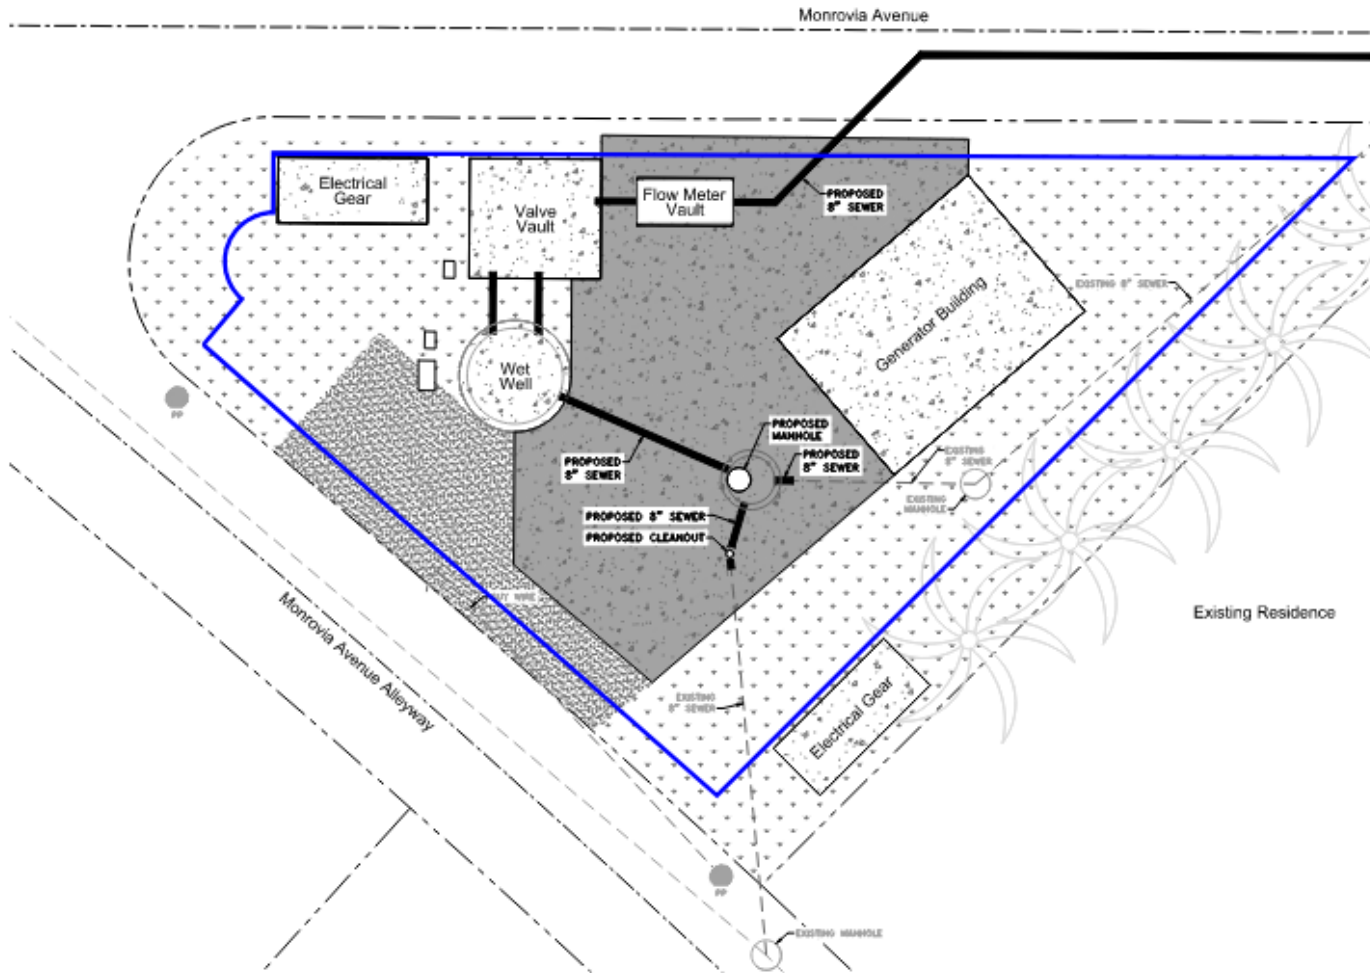

Inside the Sewer Lift Station

- Submersible Pumps & Pump Controls
- 8-Inch Sewer Force Main
- 2,600-Gallon Wet Well

Scope of Work

PROPOSED IMPROVEMENTS

- Remove Existing Structure and Equipment
- New wet well and valve vault
- Upgraded pumps and pump controls
- Modernized systems
- Secondary sewer force main
- Cost-efficient design
- Reduces operational noise

Existing vs Proposed Layout

Community Impacts

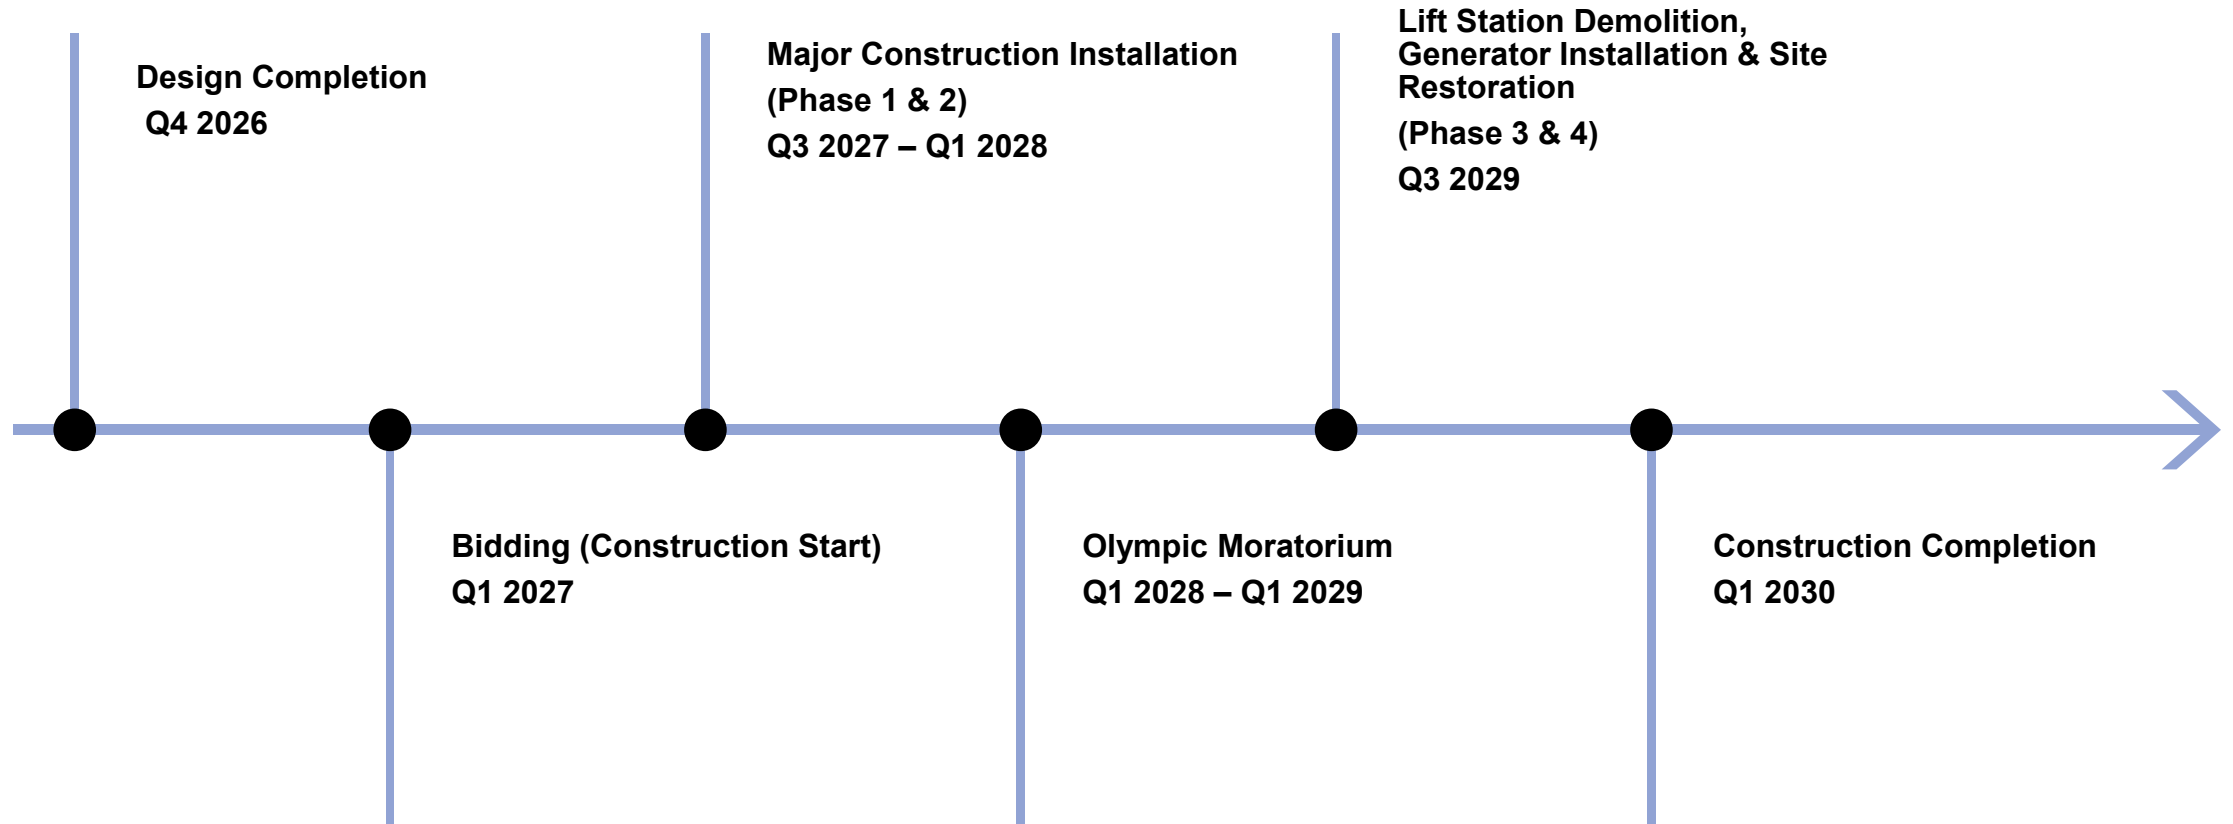

WHAT TO EXPECT

- Intermittent construction noise
- Minimal traffic impacts to the surrounding area
- Heavy construction equipment at the site
- Temporary parking restrictions

**Customers will be notified via mail on construction activity.*

Project Schedule

Schedule shown is anticipated and subject to change due to unforeseen conditions.

Major Construction Installation

End of Phase 1 & 2

End of Phase 1 & 2

Questions and Answers

Project Contact Information

Who do I contact with project questions?
