

# Long Beach Campus

Our Long Beach campus will feature an innovative whole person model of care that focuses on fully integrating healthcare, social and housing services. All services aim to meet the community's needs from physical health to mental health to supportive housing. The different components will be implemented on-site through a phased approach that ultimately serves our most vulnerable neighbors by addressing the social determinants of health on all fronts. The Long Beach campus is perfectly suited to offer a wide range of effective social services, high-quality healthcare, innovative residential options and housing support. Through strategic coordination and partnerships, we will provide sustainable solutions for our vulnerable community members in the city of Long Beach.

### Who are National Healthcare and Housing Advisors?

With decades of hands-on experience, NHHA leads the nation in offering advisory services and integrated solutions that address the housing and healthcare crisis for vulnerable populations by focusing on the social determinants of health that impact each individual. Through its proprietary integrative system of care, NHHA pioneers innovative pilot programs and data-driven outcomes to create cost-saving solutions for hospitals, payers, and health systems as well as social impact investing with the goal of creating a housing pipeline and addressing the myriad needs of these populations.
