**Denver LED Specifier Summit
Breaks Attendance Record with Debut**

One-Day Summit Hosted More Than 600 Qualified Attendees

Atlanta – The **LED Specifier Summit** (LEDSS), which debuted in Denver at the Colorado Convention Center on Thursday, September 6, hosted more than 600 qualified attendees, making it the largest inaugural LEDSS to date.

LED Specifier Summits are one-day events that offer lighting education and solutions geared toward specifiers of commercial, architectural and decorative LED lighting products. Each summit is designed to help lighting professionals stay current on the latest LED lighting trends, both through seminars and face-to-face access to leading manufacturers in a relaxed, casual setting.

See what attendees and exhibitors had to say about the experience below:

“I was so happy I attended the LED Specifier Summit in Denver and had the opportunity to meet with some manufacturers about their products,” said Dawn Hollingsworth, Principal at Darkhorse Lightworks. *“I was also pleased by the excellent turnout from the design community. It was a day well spent.”*

“Thank you for hosting the LEDSS in Denver,” said Laura Carpenter, Senior Electrical Engineer for GBA. *“It was a fantastic experience! All of the presentations provided valuable information on LED technology and integration into different venues based on quality, spectrum, control, distribution, energy efficiency and human preference. I highly recommend it! The vendor exhibit hall was excellent too!”*

“The Denver LED Specifier Summit far surpassed all of my expectations,” said Mike Ewert Regional Vice President for Hubbell Lighting. *“We had solid, consistent traffic in our booth with great customers who were genuinely interested in the new products and technologies we showcased. The event provided Hubbell Lighting and MH Lighting with the perfect venue to connect with our market and highlight our capabilities as well as make new connections.”*

Show Director Lea Tranakos said, *“We are thrilled that the Denver LED Specifier Summit exceeded our expectations for a record-breaking number of attendees at an inaugural LED Specifier Summit. We could not have done it without the involvement of our Denver lighting agency sponsors, the 100+ exhibitors who participated and the lighting industry professionals who attended. We are grateful for the support of this event.”*

The LEDSS is scheduled next in Seattle on Sept. 25 at the Washington State Convention Center. For more information about the Seattle LED Specifier Summit, go to <https://www.ledspecifiersummit.com/northwest/> or, click [HERE](#) to register.
