

March Board Meeting highlights . . .

We had 13 new members join at Orientation this month, bringing current membership to 1,027. The extended Renewal Period for existing members ended 3/15, but we still have a steady stream of new members using the online application process, so we are still growing!

Larry Baber reported good progress on the design and production of the Z-fold flyer advertising the Club's amenities, with photos being gathered and printing arranged. Look for those soon in the sign-in shack and pass some around to friends and acquaintances who may need a place to shoot.

Saturday, March 27, is our scheduled Workday for the replacement of the RR ties on Range F, moving clays, and the installation of the wind sock for the helipad. We will start at 8:00 am, so come on out to the Club if your schedule permits. I'll make the coffee!

Ruben Sandoval reported the Trap machine on Field 2 is currently non-operational, and the Board approved the purchase of a new machine to replace it. That means all our throwers will soon be modernized and ready for service, so pack your shotgun next time you head to the Club and give them a workout.

Phillip Mason stated the Safety Committee looked into the suggestion that members be allowed to fire "can cannons" on Range B.

Observation of the activity showed diagonal trajectories of the cans across the range, which is against the rule requiring firing only in your shooting lane. Therefore, the committee recommended "can cannons" be prohibited on any range, and the Board concurred.

Don't forget the upcoming Swap Meet on April 10 and . . . stay safe!
