

Newly Accredited Emergency Medicine Residency Program Now Available

Accepting applications for July 2025

The BayCare Emergency Medicine Residency Program at St. Joseph's Hospital will welcome its first class of residents on July 1, 2025. Our mission is to empower aspiring emergency medicine physicians through exceptional training, immersive hands-on experience, and dedicated mentorship. We prioritize excellence in clinical care, leadership and innovation, while promoting a culture of compassion and patient-centered care.

At St. Joseph's Hospital, you'll find an outstanding training experience. With nearly 120,000 patient visits annually, our high-volume, high-acuity Emergency Department provides exposure to a broad spectrum of cases. As an Adult and Pediatric Trauma Center, STEMI Center and Comprehensive Stroke Center, our facility ensures you'll gain experience across a wide range of clinical cases and procedures, all within one hospital setting. Our rotations take place under one roof, fostering an integrated learning environment where residents work closely with learners from other specialties.

Shayne Gue, MD, MSME, FACEP
Program Director

Dr. Gue has extensive experience in physician education. He is actively involved in national committees within the American College of Emergency Physicians (ACEP) and the Society for Academic Emergency Medicine (SAEM), and has served as a national speaker for both entities.

Dr. Gue's educational interests are focused on developing novel approaches to GME through the use of interactive curriculum design, gamification, faculty development and educational scholarship in innovative teaching strategies.

Currently accepting applications through ERAS.
