

# Pediatric Trauma Resuscitation: *From Scene to Pediatric ICU*

## **Pediatric Trauma Resuscitation:** ***From Scene to Pediatric ICU***

More children die from trauma than all other causes combined. To optimize care and survival, trauma systems must utilize a comprehensive approach to provide the highest quality of coordinated pediatric trauma care in the region.

As Suffolk County's only Level-I Pediatric Trauma Center, Stony Brook Trauma Center recognizes the crucial role that EMS plays in the *Trauma Chain of Survival* and in the entire trauma system.

Please join our Pediatric Trauma Center panel for this engaging presentation, which will review the trauma systems approach to care of the pediatric trauma patient. Discussion will focus on preparation for pediatric trauma, CDC guidelines and pediatric-specific protocols, pediatric patient assessment, and review of actual pediatric trauma cases.

### **Speakers**

**Dr. Richard Scriven,**  
*Pediatric Trauma  
Medical Director*

**Erin Zazzera, RN, MPH**  
*Pediatric Trauma  
Coordinator*
