

Members of the City of West Palm Beach expert panel on blue-green algae and the city water system.

- **Bob Cushing, PhD, PE, BCEE (Carollo Engineers).**

Dr. Cushing is a nationally recognized expert in water quality and treatment. He served on the City of West Palm Beach's 2015 water treatment alternatives panel of experts. Dr. Cushing is serving with assistance from:

- **Lyle Munce, PE** – Mr. Munce has over 30 years of experience with water quality and treatment in South Florida including West Palm Beach and regional water resources.
- **Tom Gillogly, PhD, PE** – Dr. Gillogly is Carollo's Chief Water Process Engineer.
- **Jude Grounds, PE** – Mr. Grounds was lead engineer in support of the Salem, Oregon algal toxin event.
- **William Becker, PhD, PE, BCEE Vice President (Hazen and Sawyer)** -- Dr. Becker is Vice President and the Corporate Drinking Water Practice Leader at Hazen. He directs the firm's drinking water practice, which focuses on helping utilities solve water quality and treatment challenges. Dr. Becker is also a Scholar-in-Residence at the University of Colorado, Boulder, where he teaches water treatment classes.
- **Erik Rosenfeldt, PhD, PE Associate Vice President (Hazen and Sawyer)** -- Dr. Rosenfeldt's work has focused on drinking water and reuse technology, evaluating, implementing, and optimizing conventional and advanced treatment processes for a variety of water quality concerns.
- **Chandra Mysore, PhD, PE, BCCE Vice President and Regional Lead (Jacobs Engineers)** – Dr. Mysore has more than 30 years of experience in source water quality, water treatment and water quality in the distribution system. As technical advisor, he has provided technical direction and senior level review on several large projects around the globe addressing source water quality (e.g. harmful algal blooms). He served on the City of West Palm Beach's 2015 water treatment alternatives panel of experts. Dr. Mysore is serving with assistance from:
 - **Rafael Vazquez-Burney, PE** – Mr. Vazquez-Burney is a technologist specializing in Natural Treatment Systems.
 - **David Austin, PE** – Mr. Austin is a professional engineer in the state of Minnesota and a limnologist. He has served as a water quality expert in multiple reservoir management and lake restoration projects.
