Ordering Healthwise Shared Decision Points in Epic

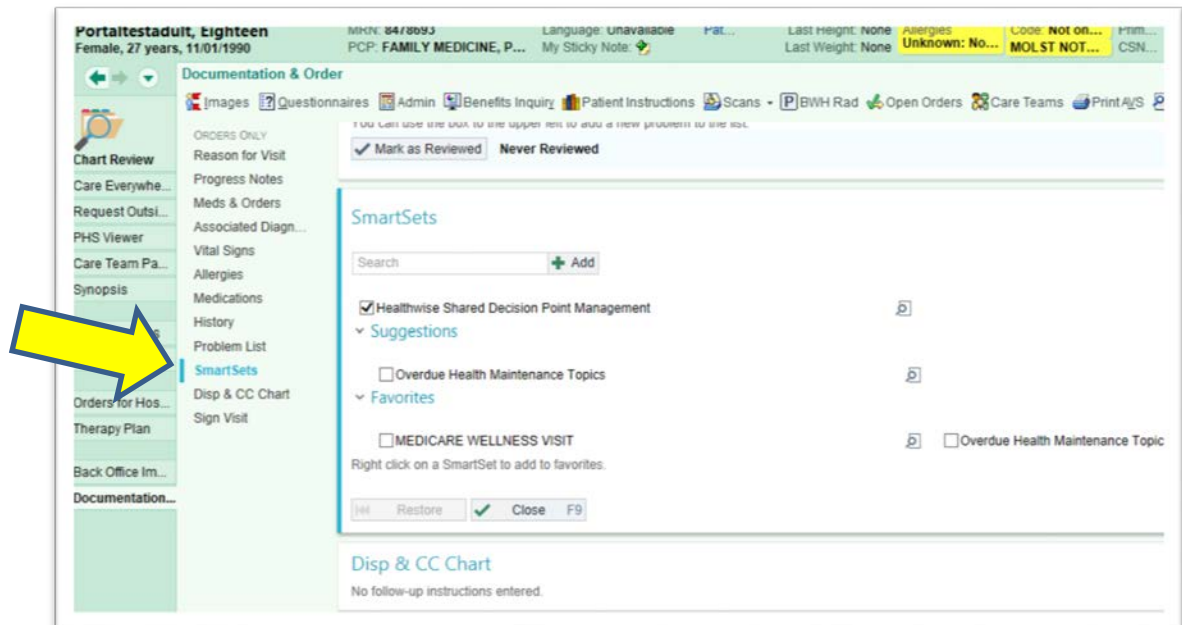

This handout will walk you through the steps for ordering and viewing the results for Healthwise Shared Decision Points in Epic. Views in Epic may vary depending upon your user role in Epic.

Ordering Decision Points:

1. Select your patient and select an encounter type (visit, orders & documentation, telephone).

2. Click "SmartSets" to get to the Healthwise Shared Decision Point Management order page:
 - We encourage the use of SmartSets to optimize the experience. The topics available will be applicable to the patient (i.e. patient is adult, female, Spanish-speaking: only the adult, female-related topics appear, with the Spanish language default).

3. Type in “Healthwise”, click “Add”, click “Open SmartSets”.

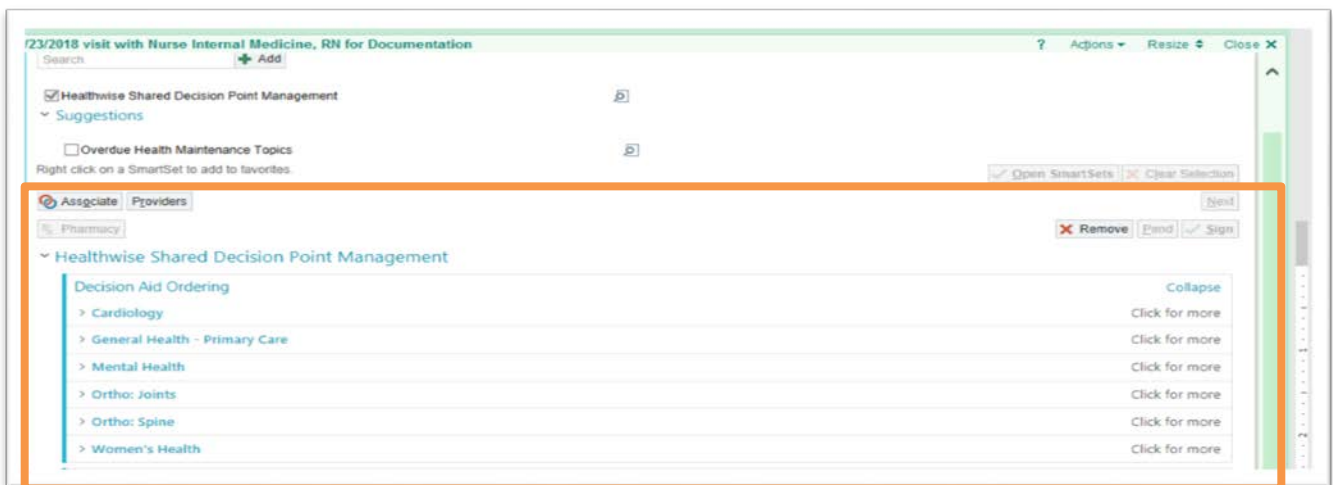

****To save the SmartSet as a Favorite on this page, hover over the “Healthwise Shared Decision Point Management” text > right click > “add to favorites”. ****

The **Healthwise Shared Decision Point Management** order page will appear.

Important Note: If patient is not active on Patient Gateway, the first message you’ll see is the system alerting you to ensure you utilize the “print” functionality (see print screenshots below).

4. Click to open the Category name to find relevant topics available to order.

5. Check-mark the titles to be ordered for the patient. More than 1 order can be placed at a time:
 - “EN” will populate as a default for every patient who does not have “Spanish” as their language preference. If Spanish is the language preference, the “SP” will populate.

The patient received a patient decision aid *** and (Desc; didnot:14019) review it prior to the visit.

We used shared decision making in the visit today to determine best approach to ***. We reviewed the patient's risk factors for the condition and discussed the options of *** and the pros and cons of each option.

We discussed patient's preferences regarding this decision. The patient felt that the following issues were of top priority in making this decision ***.

After a discussion of the patient's individual case and preferences regarding this condition, we have decided to proceed with ***.

The patient was instructed to ***.

Viewing Results

1. You can always review the status of the online decision aid by clicking “Chart Review” > “Other Orders”:
 - a. “In process”: patient hasn’t opened the decision aid.
 - b. “Final result”: patient completed the questions and you may click to see the one-page report.
