

CMS recently notified Skilled Nursing Facility providers that two issues were found in the technical coding of the Review and Correct Report, one of which also affected the Confidential Feedback Report (due for release in October).

Review and Correct Report Issue

Specifically; it was identified that, for the SNF Review and Correct Report, if one or more modification records are submitted for a patient stay, the most recent submitted assessment accepted by the Assessment Submission and Processing (ASAP) system on or prior to the submission deadline for quarters one (Q1) and two (Q2) of Calendar Year 2017 (CY2017) was not being used in the measure calculation.

Therefore, the measure results on the SNF Review and Correct Report were not being updated to reflect any changes in the measure outcomes based on the most recently submitted assessment. This applies to all measures on the SNF Review and Correct Report.

We are taking actions to correct this issue and anticipate that the report will be corrected to include the data of on modified records by early September 2017. We will continue to inform providers with further messaging when the issue has been resolved. Please note that refreshes on the calculations occur on Mondays.

Note: This report was created specifically for SNF Providers.

Technical Coding Issue

A second issue has been identified in the technical coding which has affected the calculation of one measure contained in the SNF Review and Correct Report; Application of Percent of LTCH Patients with Admission and Discharge Functional Assessment and a Care Plan that Addresses Function (NQF#2631).

As a result, the measure calculation is being corrected and retested. Once this issue has been resolved, the data for this measure will be recalculated and the updated results will be available on the Review and Correct Report. We anticipate this measure's corrected calculation will be reflected in the Review and Correct Report in early December 2017.

Additionally, the technical coding issue related to the measure Application of Percent of LTCH Patients with Admission and Discharge Functional Assessment and a Care Plan that Addresses Function also affected the SNF QRP Confidential Feedback Report (SNF Quality Reporting Program (QRP) Quality Measure Report) that was anticipated for release in October 2017. Correcting the coding issue for this measure has impacted the release of this specific report. We anticipate that this report will be released in early December 2017.

Modifications

Due to the issues outlined above, CMS is working on modifying the assessment measure data submission deadline dates for CY2017 quarters one, two, and three to coincide with the CY2017 Q4 deadline date of May 15, 2018.

This means that all data for assessment based measures required in the SNF QRP in CY2017 will remain open to modifications until May 15, 2018. Additionally, we will apply this deadline for all quarters of reporting to the Fiscal Year 2019 (FY2019) annual payment update determinations as well.

We anticipate that the data currently "frozen" as of August 15, 2017 to be subject to updates

as of mid-September. We intend to issue another notice once the Review and Correct Report Q1 2017 SNF QRP data is accessible again.

Timeframe Summary

Early September 2017

Review and Correct Reports will be corrected to enable modified records.

Mid-September 2017

SNFs will be able to access, view, and once again modify Q1 2017 data used in the SNF QRP assessment based quality measures.

Early December 2017

- Updated Review and Correct Reports will include technical updates to the calculation of the measure Application of Percent of LTCH Patients with Admission and Discharge Functional Assessment and a Care Plan that Addresses Function
- Release of the SNF QRP Confidential Feedback Reports (SNF QRP QM Reports)

May 15, 2018

SNF QRP data on measures for Q1, Q2, Q3, and Q4 will have a single submission deadline of May 15, 2018 which is the same deadline for CY2017 Q4. This deadline will also apply for SNF QRP FY2019 APU determination and will include all 4 quarters as well.

Email Blast

All facilities will receive an email blast notifying them of these issues. We will continue to send follow-up announcements as each of these issues are resolved and further guidance can be given.
