### **Player 'Code' of the Month (from 'Friend at Court' 2020)**

**9. Either partner may make calls in doubles.** Although either doubles partner may make a call, the call of a player looking down a line is more likely to be accurate than that of a player looking across a line.

**10. All points are treated same regardless of their importance.** All points in a match should be treated the same. There is no justification for considering a match point differently from a first point.

**11. Requesting opponent's help.** When an opponent's opinion is requested and the opponent gives a positive opinion, it must be accepted. If neither player has an opinion, the ball is considered good. Aid from an opponent is available only on a call that ends a point.
